Driving & Operating Heavy Machinery

After much discussion with our patients, there seems to be a concern about operating heavy machinery or driving a vehicle while taking medications prescribed by Ellis Pain Center.

We are advising all patients that they could be impaired while taking certain medications. The advice of our Physicians is that you **should not drive or operate heavy machinery** after taking your medications.

Ellis Pain Center is concerned about the safety of our Patients and we ask that you cooperate with us in this matter.

I have read the above statement and understand the risks involved in taking medication and driving or operating heavy machinery.
